

Panel Gauge

How to Order

Standard Specifications

Fluid	Air
Thread (R)	R1/8" (standard : M5 female thread)
Indication Precision	±3(Full Span)
Pressure range (MPa)	0~1.0
Ambient and fluid temperature	-5~60(Non-freezing)
Material	Clear cover Bourdon pipet
Weight (Kg)	Polycarbonate Brass 0.05

■ Caution

1. During installation of a gauge, do not screw it too tight. It can cause breakage of the product.
2. Do not use a gauge over the maximum pressure range of the specification. It can cause malfunction.
3. While transportation and installation make sure not to apply shock to the product, such as by dropping doing so will affect its precision.
4. To fix gauge, make sure to turn the gauge by placing a wrench over the square wrench flat.
